REPORT Of The SELECTMEN

ON RESOLUTION TO PUBLIC WORKS ENGINEER

At the last Town Meeting, the following resolution was approved:

RESOLVED: "That it is the sense of the Meeting to request the Selectmen to make a study and make a report at the next Annual Town Meeting on the feasibility of constructing and maintaining all public works under the supervision of a qualified public works engineer."

The Selectmen contacted five (5) towns of comparable size with Jaffrey and the following responses were received:

ALTON, N.H.: Office of the Selectmen

Dec. 8, 1971

"In reply to your inquiry dated Nov. 1971, please be advised that we had a Superintendent of Public works, but at our Town Meeting of March, 1970, he was voted out of office. His salary was $6500.00 per year."

NEWMARKET, N.H.: Office of the Selectmen

Dec. 9, 1971

"In answer to your letter dated Nov. 1971, we feel the savings of money for the taxpayers the main purpose to have one Superintendent of Public Works heading all the Departments.

By having one person in charge, we feel that the work force can be utilized to the best advantage.

The Superintendent's wages for the full year for 1970 were $8,335.00.

We hope the above information is helpful to you."

PETERBOROUGH, N.H.: Town of Peterborough, Public Works Department

Dec. 1, 1971

"The selectmen have asked me to answer your inquiry regarding the advantages of employing a public works superintendent.

First of all I shall outline my areas of responsibility as designated by my Selectmen.

1. Town Office Administration.
2. Supervision of the Town House.

3. Administer and direct the Highway, Water, Sewer, Landfill, and Cemetery Departments.

4. Advisor to Selectmen, Planning Board, Board of Adjustment.

5. Any other work assigned by Selectmen.

The advantages as represented by the above are:

1. Consolidates all departments, manpower and equipment under a central professional administration for more efficiency in planning and carrying out of workload.

2. Takes the routine business away from the Selectmen which cuts down on the hours which in turn will make the position more desirable to qualified persons, who usually decline to serve because of the time involved.

3. Professional knowledge becomes readily available through your Superintendent's contacts with New Hampshire Public Works Association, New Hampshire Water Association and other professional societies.

4. Much engineering which would be expensive or entirely disregarded is now done on the local level.

5. Takes the pressure off the department foremen and crews.

Undoubtedly there are other advantages, however, these are the ones that readily come to mind.

An apparent disadvantage is the fact that the span of control and accountability of such an individual assignment is often subject to challenge. This is especially true if the position is not set up as a "general manager" function. However, our Town presently accepts the situation and I personally feel that it can be made to work. We try to keep the relationship between the Selectmen and the individual Superintendent on a private basis – since challenges and criticisms cannot be resolved in public.

My present salary is $13,100.00 from the Town; split between Highway, Water and Town Office. I also receive $520.00 from the Cemetery Trustees for carrying out the duties of Sexton."

A Selectman from Durham, N.H., visited the town office and made a very favorable report on his public works superintendent.

The Selectmen are unanimously in favor of establishing a public works system to include Highway, Sewers, Water Works,

Cemeteries, the public beach, parks, playgrounds and any other public works program.

Highway Agent Henry J. Belletete, also feels that the Town is ready to operate under a public works Superintendent.

Respectfully,
Alfred J. Christian

Runway Sealing Project

Necessary to preserve the pavement in good repair. Last done in 1968 – four years ago.

Estimated Cost	
Patching	75.00
Seal cracks	400.00
24,000 sq yds. at ¼ gal per sq yd	
6,000 gal asphalt	1,500.00
Sand	175.00

	$ 2,500.00

Alternate 1

Apply for State funds, 50/50 and do entire project if funds are forthcoming.

Alternate 2 (if no State funds)

Do entire project now. Borrow half of project cost ($1250) and repay from available maintenance funds for next two years.

Alternate 3

Do half of project only. (This is not recommended, as the pavement would tend to deteriorate if left unsealed another year. Also this would mean two jobs, not one.)
